Fabrication of the housing shall be deep drawn aluminum and finished in a polished brushed aluminum with a clear lacquer finish. It shall measure 10.750" Dia. x 3.468" Proj. The base shall have an adapter plate for mounting to either a 4-inch square or single gang electrical box. Mounting hardware shall be provided.

### Description

Lowell's Model LCS-8NS is a surface baffle designed for either ceiling or wall mount applications where recessed installation is not possible.

The baffle with housing and grille is fabricated of deep drawn aluminum for maximum corrosion resistance. The assembly includes a galvanized rear panel/adapter plate that is punched to mount a standard 4-inch square or single gang electrical box and includes a center opening 1.125" diameter for wire access. The LCS-8NS is finished in brushed aluminum, polished to a satin sheen, and then sealed with a clear lacquer coating to prevent tarnishing. The unit will accommodate a standard 8-inch loudspeaker.

*Note: Lowell offers 8" speaker Models 805 (12W), 810 (15W) and moisture resistant model 8C10MRA (15W).*

The grille is attached to the housing with four screws which may be removed to facilitate easy speaker installation from either side. The assembly with grille, housing and adapter plate is furnished complete with mounting hardware.

#### Surface Ceiling or Wall Baffle
