

Cable Management, Flat Wire

Description:

The CMFW is a cable manager with tie-down slots and holes. It's formed from 11-gauge steel and features a unique, non-abrasive smooth rounded edge. The robust design can be used as support bracing for equipment when used with mid- or rear-rail rack applications. The CMFW is available straight or offset (approx. 2" or 4"D). Offset bars are stackable on a horizontal plane to save rack space. Black finish.

Flat wire cable managers stacked on a horizontal plane for efficient use of rack space.

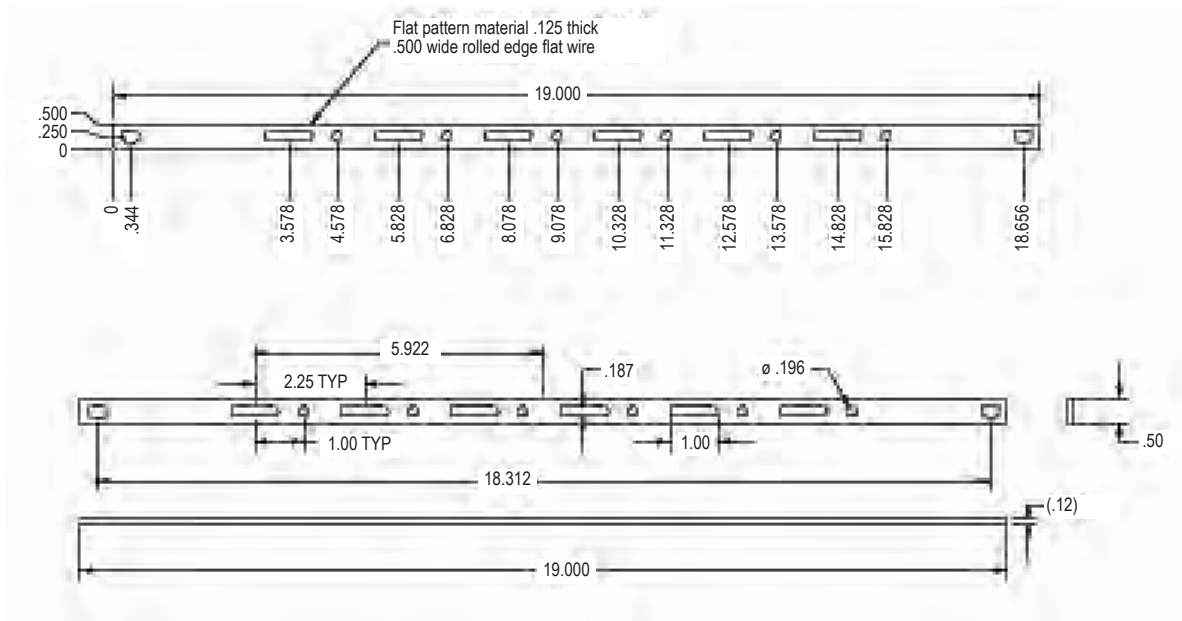

Features:

- Straight or offset flat wire cable manager
- Steel with black finish
- Offset bars are stackable on a horizontal plane
- Made in the USA with certified US steel

A & E Specifications:

The flat wire cable managers shall be Lowell Model _____. They shall be formed from 11-gauge steel and have a black finish. [Offset cable managers shall be stackable on a horizontal plane.]
