

Model No.

LLKRD

Alternate key lock assembly
for use with LDDF dual-door frame

The alternate lock and key assembly is made for use with the LDDF Series dual-door frame. By keeping the original lock on one short door and using this assembly on the second short door, you can create separate security for two sections of the rack. Order LDDF dual-door frame and two LFD Series short doors separately.

FEATURES

COMPATIBILITY: For use with Lowell LDDF Series dual-door frame and LFD Series door.

CONSTRUCTION: This assembly is keyed differently than the standard lock featured in Lowell LFD Series doors.

COUNTRY OF ORIGIN: U.S.A.

INSTALLATION: The key lock set is made for field-installation to replace the lock in one of the short doors used in the LDDF Series dual-door frame. The other short door should maintain its original key lock to provide separate access to the two sections of the rack.

A&E SPECIFICATIONS

The rack with LDDF dual-door frame and two LFD Series front doors shall include one alternate lock set, Lowell Model LLKRD. The alternate lock shall be field-installed in one of the short doors to provide separate security for that section of the rack. The dual-door frame, two doors and one alternate lock set shall be ordered separately.
