Service Interface Panel

with network connectivity ports

Made in USA with global components

Model ACR-1507-SSI-FC includes pass-through network connectivity ports, front charging ports, 15A power outlets and surge suppression.

Handy Front-of-Rack Connections—

Get quick access from the front of the rack using pass-through network connectivity ports. Just connect your device to the front RJ45 or USB port and you're tied in to the audio, security or main network—whatever interface was made at the back of the unit—without having to access the back of the rack. This simple solution provides **handy connectivity for service technicians and front-of-house customers** looking for a fast, easy way to connect to a data network or specific equipment.

Model ACR-1507-SSI-FC features:

- Two network connectivity ports (RJ45 to RJ45, USB-A to USB-B) with writable patches above them so you can identify the connections.
- Front charging ports with high speed connectors allow convenient powering of service or mobile devices like laptops, tablets, phones or even mounted equipment. Includes (3) USB-A connectors, (1) USB-A connector with Qualcomm® Quick Charge® 3.0 technology, (1) Type-C connector, 5V.
- 15A power rating—seven (7) NEMA 5-15R power outlets (1 front, 6 rear)
- Surge suppression with LED status indicator to protect against power surges and spikes up to 40,000A
- 19"W x 9"D x 1U chassis with attached 6 ft. power cord, NEMA 5-15P plug

Also available:

- **Model SIP-1:** 1U panel with network connectivity ports.
- **Model ACR-1505-SSI-RC:** 1U panel with network connectivity ports, rear charging ports, five (5) power outlets, and surge suppression.
- **Model ACR-1505-SSI-FRC (build to order only):** 1U panel with network connectivity ports, front and rear charging ports, five (5) power outlets and surge suppression.
